Diagnostic Techniques for MHD Interacting Plasmas

Doctoral Thesis 2005

Università di Bologna

Department of Electrical Engineering

Diagnostic Techniques for MHD Interacting Plasmas

Tesi di Dottorato di
Mario Roberto Carraro
XVII Ciclo

Coordinatore

Prof. Ing. Francesco Negrini

Tutori

Prof. Ing. Carlo Angelo Borghi
Prof. Ing. Andrea Cristofolini

There are many people to thank for their support and encouragement, without whom this thesis would not have been possible.

Firstly my supervisors Carlo Angelo Borghi and Andrea Cristofolini, or –in other words- my daddy and my elder fancy brother of science. Their unquenchable curiosity and love for the subject are probably the most valuable lessons I have learned from this PhD, and their continual support and encouragement have kept me going over the last three or so years.

This work has been made also possible due to the kindness of Professor Richard B. Miles, who permitted me to spend six months as a visiting PhD student at the Department of Applied Physics of the Princeton University.

My family, who have been great over the years and never raised an eyebrow when I claimed my wish of PhD studies.

And finally to Elisa, who made for me things much more durable than the encrypted experiments described in this thesis. I owe it to you.

Index

INTRODUCTION	3
<u>PART I</u>	
Chapter 1	7
The MHD Power extraction Experiment	
<u>1.1 Introduction</u>	7
<u>1.2 Ionization</u>	9
<u>1.3 Microwave as a Diagnostic System</u>	11
Chapter 2	10
Microwave Propagation Theory	
<u>2.1 Microwave Propagation</u>	13
<u>2.2 Microwave Behavior in Plasmas</u>	25
<u>2.3 Microwave Propagation in Plasmas</u>	31
<u>2.4 Sources of Error in Transmission Measurements</u>	32
<u>2.5 Non-Transmission</u>	33
Chapter 3	37
Experimental Accessories	
<u>3.1 Magnet</u>	37
<u>3.2 High Voltage Pulser</u>	37
<u>3.3 Mach 3 Flow</u>	37
<u>3.4 The Static Cell</u>	38
<u>3.5 Microwave System</u>	38
<u>3.6 Electrode Setup</u>	40

<u>3.7 MHD Current Measurement Setup</u>	41
<u>3.8 Discharge Current Measurement Setup</u>	42
<u>3.9 Imaging</u>	42
 Chapter 4	45
Results & Discussion	
<u>4.1 Relevant Parameters</u>	45
<u>4.2 Images of Discharge</u>	46
<u>4.3 Pulse Current and Voltage</u>	48
<u>4.4 Faraday Current & Voltage</u>	49
<u>4.5 Microwave Measurements in Static Cell</u>	51
<u>4.6 Emission Spectroscopy</u>	58
<u>4.7 Results and Discussion from Microwave Data Set</u>	58
 CONCLUSIONS	65
 REFERENCES	67
 <u>PART II</u>	
 Chapter 5	71
Hypersonic Flow Control Experiment	
<u>5.1 Introduction</u>	71
<u>5.2 Numerical Simulation</u>	72
<u>5.3 Experimental Activity</u>	80
 Chapter 6	81
Plasma Models	
<u>6.1 Introduction</u>	81
<u>6.2 Thermodynamic Equilibrium and its Departure</u>	81

<u>6.3 Improper Balances</u>	82
<u>6.4 Collisional Radiative Model</u>	84
<u>6.5 Continuity Equation</u>	85
<u>6.6 Simplifications</u>	86
<u>6.7 QSSS Solution</u>	86
<u>6.8 The Distribution Function and the Relative Population Coefficients $r^+(p)$ and $r^1(p)$</u>	90
<u>6.9 Coefficient for Total Ionization and Recombination</u>	92
<u>6.10 The Boundary properties</u>	93
<u>6.11 The Domain Plane</u>	95
 Chapter 7	 97
Recombining Systems	
 <u>7.1 Capture Radiative Cascade (CRC) Balance</u>	 97
<u>7.2 The Hot CRC (IV)</u>	97
<u>7.3 The Cold CRC</u>	100
<u>7.4 Cold Deexcitation Saturation Balance (DSB)</u>	102
<u>7.5 Hot Deexcitation Saturation Balance (DSB)</u>	102
<u>7.6 The boundary Between CRC and Hot DSB</u>	103
 Chapter 8	 105
Experimental Set-Up	
 <u>8.1 High Enthalpy Wind Tunnel</u>	 105
<u>8.2 Magnetic Field</u>	107
<u>8.3 Hall electrodes configuration</u>	109
<u>8.4 Shock Layer on the Test Body Surface</u>	112
<u>8.5 CCD Imaging</u>	113
<u>8.6 Emission Spectroscopy Set-Up</u>	114
 Chapter 9	 117
Results: Imaging and Electrical Measurements	
 <u>9.1 Shock Front Imaging</u>	 117

<u>9.2 Electrical Measurements</u>	118
<u>9.3 Discussion</u>	120
 Chapter 10	123
Plasma Emission Measurements	
<u>10.1 Signal to noise ratio</u>	123
<u>10.2 Plasma Spectra</u>	123
<u>10.3 Calculation of the plasma parameters</u>	132
<u>10.4 Continuum Emission</u>	134
<u>10.5 Plasma parameters</u>	136
<u>10.6 Optical Multichannel Analyzer</u>	142
